SUMMARY

Senior Full Stack Developer building business-facing products with Node.js, TypeScript and React on AWS. Background as Backend Tech Lead designing and scaling backend systems with Python (FastAPI, Django) and GCP. Experienced in software architecture (hexagonal architecture, microservices) and leading distributed teams, with a strong focus on building scalable, maintainable systems aligned with business impact.

Proven ability to bridge technical decisions with business needs, delivering reliable and production-ready solutions.

SKILLS

- **Backend:** Node.js, TypeScript, Python (FastAPI, Django), Ruby on Rails, Java
- **Frontend:** React, JavaScript, HTML, CSS
- **Architecture:** System Design, Microservices, Hexagonal Architecture, Scalable Systems
- **Cloud/DevOps:** AWS, Google Cloud Platform (GCP), Docker, Kubernetes, CI/CD, GitHub Actions
- **Databases:** MongoDB, PostgreSQL, Firestore, MySQL
- **Practices:** Agile, Code Reviews, Clean Code, Testing, AI-assisted Development (Claude)

MOST RELEVANT EXPERIENCE

Cuimo | *Senior Full Stack Developer* Jun 2026 – Present

- Developing features for Cuimo's sales website, the company's internal ERP and integrations with external services.
- Working closely with the company's departments to understand business needs and translate them into product.
- Building backend services with Node.js and TypeScript and React frontends on AWS and MongoDB.

Selectra | *Backend Tech Lead* Dec 2025 – Jun 2026

- Led backend development of business-critical applications using Python (FastAPI, Django), supporting core business operations.
- Collaborated with stakeholders and product teams to align technical decisions with business objectives.
- Designed scalable backend architecture based on hexagonal principles, improving system maintainability and evolution.
- Mentored developers and promoted engineering best practices across the team.
- Implemented CI/CD pipelines in GCP, improving deployment efficiency and reliability.

Selectra | *Software Engineer* Mar 2024 – Dec 2025

- Developed the company's core web application using Ruby on Rails.
- Contributed to system scalability and backend improvements.
- Supported deployment automation and cloud infrastructure (GCP).

Alisys | *R&D Software Engineer* Sep 2023 – Feb 2024

- Developed a Dockerized OAuth2 authentication API and communication proxy.
- Deployed applications in private cloud environments (OKD).
- Conducted research on Large Language Models (LLMs).

Sabio | *Software Developer* Jul 2022 – Sep 2023

- Developed conversational systems (ChatBots and VoiceBots) in production environments.
- Built scalable integrations with backend systems and APIs.
- Implemented CI/CD pipelines using Docker, Kubernetes and ArgoCD.

Fonetic (Sabio Group) | *Junior Software Developer* May 2019 – Jun 2022

- Developed VoiceBots and backend services in enterprise environments.
- Worked with Java, JavaScript and conversational technologies.
- Maintained and improved production systems.

EDUCATION & CERTIFICATIONS

Universidad Politécnica de Madrid 2015 – 2020

Degree in Computer Engineering (GPA: 7.8/10)

- Programación Inteligente: domina el desarrollo asistido con IA — TrainingIT (2026)
- Python Avanzado — Imagina Formación (2025)
- Docker DevOps — Openwebinars (2021)
