SUMMARY

Backend Tech Lead specialized in designing and scaling backend systems using Python (FastAPI, Django) and cloud platforms (GCP).

Experienced in software architecture (hexagonal architecture, microservices) and leading distributed teams, with a strong focus on building scalable, maintainable systems aligned with business impact.

Proven ability to bridge technical decisions with business needs, delivering reliable and production-ready solutions.

SKILLS

- **Backend:** Python (FastAPI, Django), Ruby on Rails, Node.js, Java
- **Architecture:** System Design, Microservices, Hexagonal Architecture, Scalable Systems
- **Cloud/DevOps:** Google Cloud Platform (GCP), Docker, Kubernetes, CI/CD, GitHub Actions
- **Databases:** PostgreSQL, Firestore, MongoDB, MySQL
- **Practices:** Agile, Code Reviews, Clean Code, Testing, Software Engineering Best Practices

EXPERIENCE

Selectra <i>Backend Tech Lead</i>	Dec 2025 – Present
• Leading backend development of business-critical applications using Python (FastAPI, Django), supporting core business operations. • Collaborating with stakeholders and product teams to align technical decisions with business objectives. • Designed scalable backend architecture based on hexagonal principles, improving system maintainability and evolution. • Mentoring developers and promoting engineering best practices across the team. • Implemented CI/CD pipelines in GCP, improving deployment efficiency and reliability.	
Selectra <i>Software Engineer</i>	Mar 2024 – Dec 2025
• Developed the company's core web application using Ruby on Rails. • Contributed to system scalability and backend improvements. • Supported deployment automation and cloud infrastructure (GCP).	
Alisys <i>R&D Software Engineer</i>	Sep 2023 – Feb 2024
• Developed a Dockerized OAuth2 authentication API and communication proxy. • Deployed applications in private cloud environments (OKD). • Conducted research on Large Language Models (LLMs).	
Sabio <i>Software Developer</i>	Jul 2022 – Sep 2023
• Developed conversational systems (ChatBots and VoiceBots) in production environments. • Built scalable integrations with backend systems and APIs. • Implemented CI/CD pipelines using Docker, Kubernetes and ArgoCD.	
Fonetic (Sabio Group) <i>Junior Software Developer</i>	May 2019 – Jun 2022
• Developed VoiceBots and backend services in enterprise environments. • Worked with Java, JavaScript and conversational technologies. • Maintained and improved production systems.	
Optiva Media <i>Software Developer Intern</i>	Jun 2018 – Dec 2018
• Developed internal web applications using Node.js and AngularJS. • Participated in CI pipelines and deployment processes using Jenkins and Git.	

EDUCATION & CERTIFICATIONS

Universidad Politécnica de Madrid	2015 September – 2020 September
Degree in Computer Engineering (GPA: 7.8/10)	
TrainingIT	2026 April
Programación Inteligente: domina el desarrollo asistido con IA	
Imagina Formación	2025 July
Python Avanzado	
Openwebinars	2021 August
Docker DevOps
